

I had a cross on the wall in my bedroom when I was a kid
it was there for years until one day I had to clean my walls
When I took down the cross, a shadow still remained

It was quite powerful & eerie to see this shadow on first glance or two

Could it have been the mighty power 'they' speak of?
Or just a clean spot where the dust couldn't get to...
or some sort of charge differential that attracted the dirt to
build up all around it, but not beyond it...
ooooooooooh :-O

Sting's deep lyrical foray into the sins of the church in the times
when they held a strong hold in the ruling of the lands
Must have been hard for some to live with & must have been harder still to
have stood up to demand an end to tyranny while feeling that they may also
be damning themselves to hades.

A very powerful song about the right to religious freedom.
